

Oak Frame Kits

GARAGES • GAZEBOS • PERGOLAS • PORCHES

Hewins Oak Frame Kits provide a simple, affordable way to bring the status and genuine appeal of an oak frame to your home.

Sawn from sustainably grown European Oak, the frame members are carefully machined and fully prepared for assembly, incorporating classic joint designs and features.

Planed to a smooth finish, the frame can be left untreated and will weather naturally to a silvery grey, or can be oiled at the time of install to maintain the classic golden tone, though this will require regular upkeep. Oak dowel pegs are included in the kit.

Our range of traditional designs provides for many tastes and varied situations. We can also work with modifications to these, or even create completely bespoke designs.

Our experienced team will be on hand to go over the options with you and also discuss how you intend to erect, clad and finish the frame.

Garage Kits

- Burford
- Broadwindsor
- Chantemarle
- Fordscroft
